Operating Environment

Make sure that the correct operation environment is set up properly.
· PS4 Pro ／ PS4
· Computer with Internet connection　[OS: Windows 7/8/10 (32bit / 64bit)]
　 * Operation is not guaranteed when used with system environments other than the above
　 * Tethering is not recommended due to large data transfer size
· PlayStation 4 with a PSN account (PSN ID) and password
· USB flash drive: 8GB or higher
　 * You have to transfer your saved data from PS4 to a USB flash drive, then access it on the computer to edit.
· Hard drive free space: 10GB or higher
* saveEditor can be downloaded on multiple PCs (one account will be synced on all devices)
Let's Begin!

You need to enter the serial number and create an account to use Save Editor.

Enter the serial number.

1 After installing the software, click on the Save Editor icon on your desktop. A dialogue box will appear.

User License

User license configuration is as shown below.

One-User License

Account Registration

You can use only one PSN ID registered on your PS4

| Serial Number | | User 1 | | PSN ID1 |

PSN ID2

PSN ID3

TXT
Create an account

When creating an account, you need both your PSN ID and your save data (from a USB flash drive).

* PS4 game save data

  Each user's save data will be managed separately even if they're on the same game.

Example

| Game 1 | User A saves a Game 1 data with his PSN ID (Save1) |
| | User B saves a Game 1 data with her PSN ID (Save2) |

For example, User A cannot use Save2 and User B cannot use Save1. Likewise, User A can only edit the save data with his registered account on saveEditor, and User B can only edit the save data with her registered account.
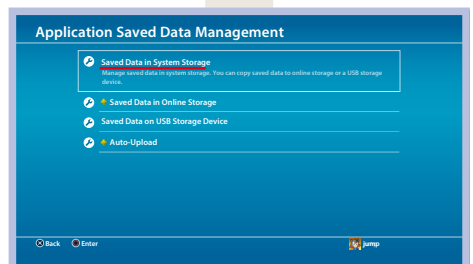

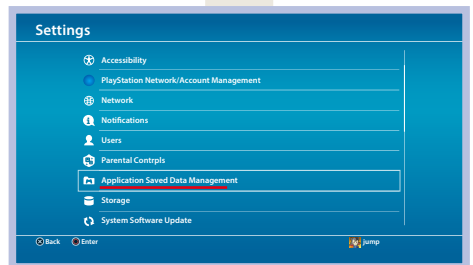

If you accidentally created an account with a different PSN ID, you can delete this account. However, there is a limit so you have to be careful. See Deleting Accounts under Settings.
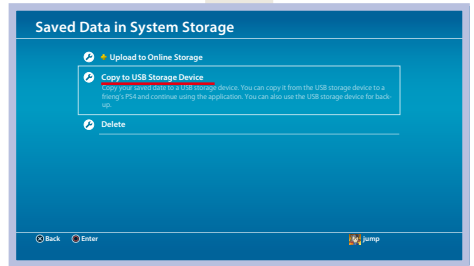

How to Create an Account : First Step (PlayStation 4)

① Insert your USB flash drive to your PlayStation 4 system and turn the power on. Log on with the PSN account that you want to use on Save Editor.

* You won't be able to have the option [Copy to USB Storage Device] later if you don't log on.

② Go to [Settings] → [Application Saved Data Management] → [Saved Data in System Storage] →[Copy to USB Storage Device]

F.A.Q.

Q.Can I add game titles?

A. Unfortunately, you cannot add game titles on the list. However, supported games will be added continuously. Check the updates for details during startup of Save Editor.

Q.How come the patch codes don't work even after I apply them?

A. One of the following may be the issue:

①The game version is different.

If the game software is updated and the save data file gets modified, there is a possibility that the patch codes may not work.

* We continuously update patch codes as new versions of games come out, but if and when the current patch codes don't match with the latest game version leading to an error in your save data, use the [Restore from bsckup] function to return it to its state before your applied the patch code.

②The USB is write protected

Any sort of modification or deletion of a file is blocked.

③The patch code you entered is incorrect.

Q.Why is saveEditor not loading?

A. The server is under maintenance or the installation was not correct. Also, the Internet may not be connected.

Q.Can I use another device besides a USB?

A. No. Use only a USB flash drive.

Q.Can I use a save data from my PSN sub account?

A. You can use any save data from any account.

Q.How do I update saveEditor?

A. saveEditor is automatically updated during startup when new versions are available.

Q.Can I delete my current account and create a new one?

A. Yes, you can delete your current account and create a new one right away. However, you have to wait for 30 days to be able to delete the new account.

Q.Why do I need my PSN logon information?

A. This is per PS4 product specification. You need your PSN logon information to access any PS4 save data that you save on a USB flash drive.
